

What if memory care came in a setting as warm and welcoming as a summer home?

AT SUNNY VIEW
a front porch community

Welcome to Summer House at Sunny View,

where residents with memory care needs flourish in an intimate setting. Our neighborhood is a comfortable, intimate retreat with a protected garden. Here, people with Alzheimer's and dementia-related conditions are honored and cared for as unique individuals, so they can feel connected, relaxed and engaged.

A family place.

Take a relaxed tour around our place. Inside, discover spacious, sun-filled living spaces adorned with engaging art. Stroll together through our soothing garden retreat, gather around the table for family-style dining or enjoy meaningful connections by engaging with residents through art and music. Our picturesque grounds are welcoming and comfortable, ideal for family gatherings and casual conversation. All designed to feel inviting and warm.

A peaceful setting in a quiet neighborhood.

Summer House is home to 23 suites in an intimate setting. We support wellbeing through art and music programs that help residents express themselves more freely, and—above all—we believe in compassionate caregiving.

Our staff is devoted to honoring and celebrating each individual, building familiarity and forming close bonds.

Designed for ease of accessibility with barrier-free living, including roll-in

showers and bathrooms, and unobtrusive monitoring technology by caregivers for peace of mind.

Surrounded by Sunny View's park-like campus, Summer House is a unique memory care neighborhood with a protected garden along a tree-lined path. Here you'll find a comfortable place with modern sun-filled rooms surrounded by caring staff focused on each individual in an engaging community setting.

Whole Person Wellbeing.

Living well goes far beyond meeting physical needs. Our expert staff is attuned to the holistic needs of our residents. We get to know each individual and what they love. It's this connection and close bond that nurtures community, encourages engagement and invites friends and family to come together. Summer House offers enrichment opportunities including art, pet therapy, music, family-style dining and events—all aimed at encouraging engagement with a focus on meaningful interactions and connections.

Engaging Innovation.

Our innovative approaches to caregiving focus on the individual and encourage self-expression. Supported by the Front Porch Center for Innovation and Wellbeing, Summer House features engagement technologies like music therapy, virtual reality tools, an advanced interactive therapeutic robot called Paro and It's Never 2 Late®, an interactive touch screen that residents use to tap into a host of apps that focus on engagement.
